Goodness of tradition

Goodness of tradition

With four decades of manufacturing excellence, **TiLAK** is the oldest industrial manufacturer of bio-friendly paint, polish and protective coatings in Kerala, India. In strict adherence to our core philosophy of bio-friendliness, all our products are based on Cashew Nut Shell Liquid (CNSL). As a result, our products are biologically degradable, durable, sustainable, emit low VOCs and are harmless to humans, animals and plants. While the traditional formulations have helped us achieve our goals, we have gone in an unrelenting pursuit of quality and perfection, to deliver the best for our customers. With 34 years of research and development, we have incorporated numerous innovations to our products that give them uncompromising quality, durability, gloss and finish.

i am Green

The ever-increasing demand and modern methods of production have almost always had an impact on the environment. Usually, the visible destruction or damage gets our attention the most. Invisible damage and harm go unnoticed. Volatile Organic Compounds (VOCs) added to paints as binders play a major role in this invisible harm. VOCs are organic chemical compounds that evaporate easily and reach the atmosphere. They are known to be a major contributor to global climate change. Many of them are highly toxic and linked with numerous health problems. Modern chemical paints continue to emit VOCs for longer period after their application. However, there is a traditional method of manufacturing these and we at **TiLAK** make our products using a natural ingredient - Cashew Nut Shell Liquid, making it safe for people, environment friendly and delivering all the goodness of nature and tradition.

“Traditional way is the nature’s way. It is in tradition to protect and conserve nature.”

Products that pack tradition

TiLAK offers a wide range of distinguished bio-friendly products. They are formulated and manufactured with safety and environment in mind, and they conform to strict regulations. Backed With research and continuous improvement, our products offer great quality, durability, shine and finish. They protect all types of surfaces from corrosion, moss, white ants and salt water. Moreover, our products help the surfaces to withstand exposure to water, acids and alkalis. The protective features of our products are tested and complied at The Council for Scientific and Industrial Research (CSIR), and our bio-friendly Low Volatile Organic Compounds (VOC) products meet relevant International Standards.

Bio-friendly

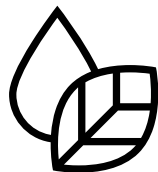

Low VOC

Cleaner & safer

Less waste

Responsibly-sourced raw materials

Low resource consumption

Our Product range

Wood Polish

Anti-corrosive Coatings

Paints

Protective coatings for wood

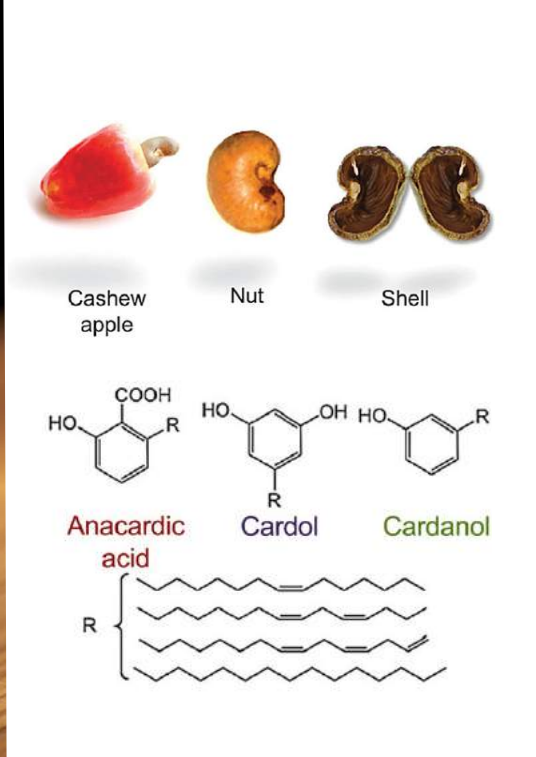

Multi-Purpose Coatings

Leak Proof Coatings

CNSL Resins

Bio-friendly products since 1986

“ The protective features of our products are tested and complied at The Council for Scientific and Industrial Research (CSIR), and our eco-friendly Low Volatile Organic Compounds (VOC) products meet relevant International Standards. ”

Cashew Nut Shell Liquid

Replacing Toxic Chemicals with Traditional Goodness

We strive to drastically reduce VOC emissions and ensure health and safety of our customers. We are also committed to keeping the environment clean. We achieve this by replacing harmful chemicals with a substance derived from nature - Cashew Nut Shell Liquid (CNSL), a versatile by-product of the cashew industry.

Trapped in the cashew shell, this dark reddish brown viscous liquid has unsaturated phenols, which makes it ideal for use as surface coatings, paints and varnishes for a wide range of applications, as well as in the production of polymers.

“ Compared to conventional paints and primers, our products emit much lower VOC and lack Ozone-depleting substances, harmful glycol ethers, Polyurethane content, known carcinogens, mutagens or reproductive toxins and prohibited substances such as toluene. ”
