i am Green

Goodness of tradition

Bio-friendly, sustainable, and low VOC emissions – these are what our products are all about. Based on Cashew Nut Shell Liquid (CNSL) our paint, polish, and protective coatings range truly adhere to our core philosophy of bio-friendliness and cause no harm to humans, animals, and plants. We are one of the oldest paint and protective coating manufacturer in Kerala. In the last 34 years, we have invested significantly in research and development and come up with innovations that have given our products uncompromising quality, durability, gloss, and finish.

TiLAK - Delivering the goodness of nature and tradition.

The impact of Volatile Organic Compounds (VOCs) on the environment and the adverse effects it can have on human health have been discussed enough. The paint and coatings manufacturers have been trying to come up with new formulations, adopt new technologies and application methods to meet the various environmental regulations. At Tilak, we have spent 4 decades in identifying raw materials and fine-tuning manufacturing processes to come up with products that are durable, sustainable, and emit low VOCs. All our products are now based on the natural ingredient - Cashew Nut Shell Liquid, making it safe for both people and the environment.

Versatile protection

Tilak Multipurpose Coating compound is a protective coating for multiple surfaces such as wood, concrete and steel. This highly resilient coating protects surfaces from water, salt water, white ants, acid and alkalis and prevents growth of mould, moss and fungi. While offering the highest protection against various factors that damage the surfaces, it also doubles up as a paint with unmatched gloss and finish.

Applications: All surfaces of Timber, Masonry including Exterior walls, Iron and Steel.

Features

- Can be used both as paint and primer
- Protection from water, saltwater, acid and alkalies
- Prevention of moulds and smuts
- Protection from Moss, White ants, Fungi, etc.
- Bio-friendly
- Easy application

Available in 20 L drum only

TiLAK Leak Stop

Waterproofing sealant with distinction

The life of a building is significantly reduced by exposure to elements. Water seepage can weaken the building and cause discomfort to the residents. It will also cause fungal growth and related health issues. Tilak Leak Stop is a natural and eco-friendly waterproofing coating that stops the seepage of water and protects your building from damage for a long time. Once dried, it also becomes sterile, protecting your building from harmful pathogens.

Applications: Concrete structures like RCC roofs, Water tanks, etc.

Features

- Bio-friendly
- Economical
- Quick setting and drying
- Prevents leaks and water seepage
- Becomes sterile after drying
- Easy to apply with painter's brush

Available in 20 L drum only
